

ARJUN VASHISHTHA

Full-Stack Developer • AI Builder • Data Science • SDN Engineer

+91 9105459616 | arjunvashishtha2004@gmail.com | Bhopal, India | github.com/arjundroid12 | arjunv.is-a.dev

PROFESSIONAL SUMMARY

Fourth-year B.Tech CSE student at VIT Bhopal, currently leading Website Management & Marketing at AIOorders × Foodswipe. Bridges product, data, and growth — managing websites across two brands, coordinating software delivery, and driving marketing through UGC content and paid social campaigns. Strong foundation in Python, machine learning, and data analytics, with hands-on experience building autonomous AI agents, full-stack web applications, SDN controllers, and data-driven solutions. Passionate about shipping practical products that solve real problems. Live portfolio: arjunv.is-a.dev.

EXPERIENCE

Website Management & Marketing Head

AIOorders × Foodswipe | Nov 2025 – Present | Remote

- Leading website management and marketing across both AIOorders and Foodswipe brands.
- Manage website updates, performance tuning, and content drops for two products simultaneously.
- Plan and run marketing campaigns across Instagram, Facebook, and Google Ads to drive reach and engagement.
- Create UGC content and produce/edit video to support brand and product marketing initiatives.
- Coordinate software delivery timelines and own cross-functional comms between dev and growth teams.

KEY PROJECTS

🔗 PORTFOLIO HIGHLIGHT

Dual-Version Portfolio — arjunv.is-a.dev

Premium dual-version interactive portfolio. FUN version: dungeon/RPG-themed with 8-layer parallax caves, animated King character, Goddess NPC with 167 sarcastic dialog lines, achievement system (10 unlockables), treasure chest loot, RPG-style project cards with rarity borders, ambient castle music, and an interactive terminal portfolio with playable Snake game and 4 themes. Built with Next.js 16, Framer Motion, Web Audio API. Deployed on Cloudflare Pages with custom domain arjunv.is-a.dev.

15+ projects built across AI products, computer vision, networking, full-stack, frontend, and backend. Selected highlights below — see all projects with live demos at arjunv.is-a.dev.

QUIRK — AI Toolkit for Content Creators

AI-powered toolkit with three features: Script Studio (platform-specific scripts with hooks, pacing, CTAs + inline AI editing), Idea Engine (generates 4-10 personalized content ideas per batch with niche/platform/tone controls + idea bank with status pipeline), and Thumbnail Tester (upload 2-3 thumbnails, AI scores on composition/emotion/text legibility/CTR, picks winner with reasoning). Built with Next.js 16, Tailwind CSS 4, shadcn/ui, magic-link auth, Turso database, Z.AI GLM-4.5-flash for text AI, Groq Llama 4 Scout for vision. Deployed on Vercel. Live and fully functional.

Tech: Next.js 16, TypeScript, Tailwind CSS 4, shadcn/ui, Turso, Z.AI GLM-4.5, Groq Llama 4, Vercel

Link: quirk-ten.vercel.app

SDN Controller — Ryu + P4 + DDoS Detection

Custom Software-Defined Networking controller on Ryu + OpenFlow 1.3 with a P4-16 data plane for BMv2. LLDP topology discovery, reactive L2 forwarding with BFS shortest-path, and a real-time DDoS detector using threshold + entropy anomaly detection that auto-installs ACL drop flows. Includes Flask REST API (16 endpoints), D3.js topology dashboard, sdnctl CLI, and a 66-test pytest suite with GitHub Actions CI on Python 3.9/3.10/3.11.

Tech: Python, Ryu, P4-16, OpenFlow 1.3, Mininet, Flask, D3.js, pytest, GitHub Actions

Link: github.com/arjundroid12/sdn-project

SpellCaster — Gesture-Controlled Spellcasting

Gesture-controlled spellcasting web app. MediaPipe Hands detects 21 landmarks per hand in real time, gesture classifier smooths jitter, and a spell fires from your fingertip with neon particle effects + synthesized Web Audio sounds. Six spells: Fireball (fist), Shield (open palm), Lightning (V sign), Magic Missile (pinch), Heal (thumbs up), Ice Blast (flat sideways). Pure vanilla JS, no deps,

runs entirely in browser. Live demo on GitHub Pages.

Tech: MediaPipe Hands, Web Audio API, Canvas 2D, Vanilla JS, GitHub Pages

CORE SKILLS

Data Science & Machine Learning: Python (Pandas, NumPy, scikit-learn), CNN, Random Forest, NLP, exploratory data analysis, model building & evaluation

AI Engineering: Cerebras, OpenAI API, ReAct Pattern, Multi-Agent Systems, Pyodide, LLM integration

Computer Vision: MediaPipe Hands, hand pose tracking, gesture recognition, real-time webcam processing, Canvas 2D rendering

Networking: Software-Defined Networking (SDN), Ryu Controller, P4, OpenFlow 1.3, Mininet, network topology discovery, DDoS detection

Web Development: JavaScript, TypeScript, React, Next.js 16, Node.js, Express, Tailwind CSS, Framer Motion, Three.js

Data & Analytics: Power BI, MySQL, Excel, data cleaning & preprocessing, data visualization

Software & Product: Website management, project coordination, AI website building, no-code app development, REST API design

Marketing & Content: UGC content creation, social media advertising (Instagram, Facebook, Google Ads), video editing & videography

Tools & Platforms: Git, GitHub Actions, Vercel, Render, Cloudflare Pages, Three.js, MediaPipe, Web Audio API, Flask

EDUCATION

B.Tech in Computer Science & Engineering

VIT Bhopal University, Bhopal | 2022 – 2026 | Fourth Year (Undergraduate)

INTERESTS

Music (vocalist & guitarist), videography, content creation, social media, and game development. Active GitHub contributor with daily coding challenges auto-committed via GitHub Actions.
